Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 2 is objected to because of the following informalities. In lines 9-10, "is charging the bone graft material" is not grammatically correct. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bruce (US 5,800,409).

Bruce discloses an elongate tubular member having an open distal end and radial discharge holes 34 (Figs. 1 and 4, col. 2, lines 49-67 and col. 3, lines 1-39).

The initial statement of intended use and all other functional implications related thereto have been considered but do not appear to impose any patentably distinguishing structure over that disclosed by Bruce.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Cragg (US 6,899,716).

Cragg discloses a minimally invasive method of delivering bone graft material including the steps of: (1) creating an axial bore or portal; (2) inserting a needle 206 with one or more laterally opening ports depending upon desired performance

characteristics; and (3) pumping bone growth or bone graft material through the needle to fill fissures or defects in bone (Figs. 12, 15 and 17, col. 19, lines 66-67, col. 20, lines 1-26, col. 25, lines 27-57, col. 26, lines 9-67 and col. 27, lines 1-40).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
